

NeuroInsight Course – Recommendation letter template

Dear Admissions Committee:

I am writing on behalf of <student name>'s application to the NeuroInsight Summer course offered at Oslo Metropolitan University. <student name> is a Phd/Master student in my lab since ____ and has been doing research in the field of neuroscience.

<student name>'s working research title is <title of the research>. The goal of this research is <brief description of the research goals>. To that end, <student name> will use data from <describe the data source/kind> and analyse it with <cite some methods the student will use in his/her research>.

<Please tell us something about how it is working with the student>

I understand that to fulfil the academic requirements of the course, <student name> has to deliver a report where he/she apply concepts, knowledge's and methods learned during the course, in the context of his/her current research in my lab. I consent the student to use data generated in the lab to fulfil the course requirements, and I further agree that the student if free to openly discuss details about the data and his experiment with the course teaching staff so <student name> can successfully complete the course. Thus, I ensure that <student name> will have the proper conditions to deliver his report after the summer course.

I also attest that <student name> has fundamental knowledge of statistics, and has basic programming skills. As I see, <student name> has the ability and the motivation to complete the academic requirements of the NeuroInsights summer course.

Sincerely,

<Name, title, affiliation >
