

SEPTEMBER 07TH TO NOVEMBER 06TH, 2026

HESAV INTERNATIONAL TRAINING MODULE EXCHANGE IN FORENSIC RADIOGRAPHY

HESAV

Haute École
de Santé - Vaud

Hes·so

The School of Health Sciences (HESAV), Radiography Degree Programme, in partnership with the University Center of Legal Medicine (CURML) in Lausanne, organizes a HESAV International Training Module Exchange in Forensic Radiography (HITMEFR).

As a consequence of the use of radiological imaging techniques, and as part of routine forensic investigations, the forensic radiographer has become a specific member in the medicolegal team.

Forensic radiography has also emerged as a challenging and specific subspecialty of radiography and has enlarged the traditional professional role and skills of radiographers. This course is an introduction to Forensic Radiography and an initiation into its practice aimed at undergraduate BSc Radiography students.

INFORMATION & APPLICATION

Open to	Radiographer Students from HESAV's Swiss-European Mobility Programme partner universities
Field	Medical Imaging
Type of Education	Exchange Training Module
Language	Certified English level B2 of Common European Framework of Reference (CEFR)
